
Based on a student's level of achievement and teacher recommendation a student may be moved from one level to another at the end of the school year. The science teachers at MCHS want each student placed in a class level that allows the student to achieve at his or her highest potential while being challenged to think and create more each day.

*** Chemistry is a prerequisite to take Anatomy & Physiology or students must be concurrently enrolled.**

- **Two (2) years of science are required to meet graduation requirement**
